

# paysages MTL landscapes

*Perspectives past and present  
of Montréal's landscape*

Miles Noël

Simon Bachand

Arianna Garcia Fialdini

SOUVIENS

MTL is an incredible city full of stories that take place against a backdrop steeped in history. Three artist from diverse backgrounds have come together to interpret a different aspect of Montreal's fascinating historical, natural, architectural and human landscape. Please join us for a drink, and come on a visual journey into three different perspectives of this very special city.

**Gallery Hours** Daily 10am - 5pm

## pay~~s~~ages MTL landscapes

### MILES NOEL

An Australian graphic artist who has created a collection of artworks inspired by the Expo67 World's fair, and Moshe Safdie's revolutionary urban housing concept, Habitat 67. He has depicted Expo's experimental architecture passing through Montréal's dramatic seasonal variations through carefully designed stylised painting and printing techniques. Accompanying the work is a sculptural diorama of a North American forest.

### ARIANNA GARCIA FIALDINI

A Mexican born visual artist who has created artwork about Montreal's landscapes and personal stories that form part of it presently and in past times. She is approaching this idea through both portraiture of chosen inhabitants and the study of urban landscape in her paintings using mixed media.

### SIMON BACHAND

A Montreal born artist with a background in 2D cartoon animation. The subject of his latest collection is literally close to home - Montreal's iconic staircases. These beautiful structures are part of daily life in Montreal, and provide a platform for social interaction with neighbours, bringing the cities people closer together. He has painted their great variety of shapes and spiralling movement using his signature energetic brushstrokes.
